New Brunswick (H 5), Middlesex County.

On the Pennsylvania Railroad and the Raritan River Railroad. Stations of both roads in the city. Population, 20,006. Money order post-office and numerous telegraph stations. Express service, Adams, United States and several local companies. Tax rate, \$2.50.

The city has fine water-works and a sewerage system which gives perfect drainage to every part.

There is an active and energetic Board of Trade comprised of the most progressive business men, who pay unremitting attention to developing the material resources of the community.

Water communication with New York by the Raritan River, which flows through the center of the city, affords, with the railroads, a choice of routes for the shipment of freights.

Land in any quantity desired, some of it along the banks of the Raritan River or the railroads, may be purchased at very favorable prices. Labor of all kinds, skilled and unskilled, is here in abundance and wages are moderate.

Considering the natural advantages of location on a navigable stream leading to deep water, superior shipping facilities, cheap land, good water supply, abundance of labor, and proximity to other large cities, New Brunswick offers many important advantages to those in search of a location for manufacturing industry.

There are several factory buildings now idle, some equipped with steam power, which will be leased at moderate rental or sold outright.

The following are the most important establishments now in operation here:
